

## Section: Narratives - Needs Assessment

### Introduction

The findings of a recent study showed that there is a significant benefit to students who participate in out-of-school-time (OST) programs. In fact, the Return on Investment of Summer school Programs in Pennsylvania study determined that for every dollar invested in summer school programming for students there was a return of \$6.69 in potential benefits to students, including reduced rates for drop-outs, teen pregnancy, substance abuse, crime and delinquency ([Link PSAYDN.org](#)).

In accordance with the American Rescue Plan (ARP) Act and Pennsylvania Act 24 of 2021 (Act 24), the Pennsylvania Department of Education (PDE) will award approximately \$50,000,000 or one percent (1%) of Pennsylvania's ARP Elementary and Secondary School Education Relief (ESSER) State Reserve funds to support school districts, charter schools and cyber charter schools (collectively, LEAs) in the development and implementation of comprehensive after-school programs to address learning loss in response to the academic, social, emotional and mental health needs of students and subgroups of students impacted by COVID-19 public health emergency that supplement school programs and activities.

Act 24 requires that, when available, existing personnel shall be utilized by school districts, charter schools and cyber charter schools to staff programs and activities established with these grant funds.

Within 90 days of receipt of these allocations, school districts, charter schools and cyber charter schools must submit a three- part plan to PDE, that outlines the proposed use of the grant money, itemized by program and activity. This plan is part of a consolidated application that includes after-school programming, summer programming, and a comprehensive plan to address learning loss. The plan shall include:

- 1) A description of each program and activity
- 2) A narrative outlining the expected benefit of each program and activity
- 3) A budget for each program and activity detailing personnel and operating costs

PDE has developed the Accelerated Learning Toolkit, a significant cadre of resources and trainings, to support LEAs in the development of their plans. The Accelerated Learning Toolkit can be found [Link to Accelerated Learning Toolkit](#).

**Section 1 - Needs Assessment:** In this section, LEAs are asked to describe the impact of the pandemic on their students since March 2020.

### Indicators of Impact

1. Describe how the LEA identified students for inclusion in a summer school program. Include a brief description of the indicators used in the decision-making process.

Union School District's student demographics identify more than 2/3 of the student population as being socio-economically disadvantaged. Many of these students lack support in the home as well as the ability to attend school related programming outside of school ours as they do

not have adequate transportation available. Therefore, our district looks to maximize the effectiveness of programming during school hours as well as during limited afterschool and summer programming. To facilitate quality educational programming, Union School District needs to align our curriculum to the PA Core Standards while providing for appropriate sequencing of cores skills. The district would like to provide opportunities for teachers to align curriculum through a district led alignment process during summer months. Intermediate Unit personnel will assist with guiding the curriculum development and alignment process to ensure learning for students focuses upon targeted core skills needed for student success. Likewise, the curriculum developed can then be piloted with small groups of students who volunteer to participate in summer learning. Students offered the opportunity will be identified through the district's Early Warning System which prioritizes student behavioral data, attendance data, course grades, and benchmark assessment performance.

**Section: Narratives - Summer School Program Questions**

**Summer School Program Questions:** In this section, LEAs are asked to describe the activities they have designed to provide summer school programming for their students.

2. Identify the target student-group for the summer school program. Will the focus be on academic growth, social and emotional wellness, or some other factor to support student growth? For each group, provide specific strategies that were used or will be used to identify and measure impacts.

Student Group	Area of Focus	Number of Students Served	Provide specific strategies that were used or will be used to identify and measure impacts
Children from Low-Income Families	Academic Growth	15	Student measures as identified by the Early Warning System will be compared to previous data in looking for positive growth measures. Students shall see an improvement in classroom academic scores in the subsequent school year as well as scoring on benchmark assessments. We are looking for greater than a year's worth of growth for students participating in the program.

3. Describe the evidence-based resources that will be used to support student growth during the summer school program.

Utilizing small group instruction of standards-aligned curricular content prior to the start of the upcoming school year will help students by reinforcing previously taught skills as well as previewing upcoming skills during summer sessions. The process will have the dual benefit of students having additional instructional time with newly aligned content and teachers having

paid time to pilot new lessons/curriculum with their students who struggle the most.

4. Describe the staff that will provide the summer school program (i.e., internal staff or outside resources).

Number of Staff Members	Internal/Outside Provider	Role
10	Internal Provider	Classroom teachers

**a. The LEA assures it understands it is responsible to offer the work to its internal employees prior to engaging outside entities.**

**b. The LEA assures it understands it is responsible to ensure that all summer school program staff hold the appropriate certifications for the program that is being delivered.**

5. How will the LEA assess the success of the summer school program? Please identify the tool, frequency of use, and expected results.

Tool Used to Evaluate Success	Frequency of Use	Expected Results
Early Warning System - student grades and benchmark assessments	Semi-weekly	It is expected that there will be a 25% reduction in the number of students being identified as at-risk through the Early Warning System while there is an expectation of 1+ year's worth of growth on benchmark assessments for students who fully participate.

6. How will the LEA engage families in the summer school program?

Families of students who are selected for participation in the summer program will be given the opportunity to meet with participating teachers to conference concerning their child's needs and progress. Parents will be provided with strategies to help their children at home and

methods of preparing their child for the upcoming school year.

**Section: Budget - Instruction Expenditures**

Instruction Expenditures

**Budget**  
 \$16,731.00  
**Allocation**  
 \$16,731.00

**Budget Over(Under) Allocation**  
 \$0.00

Budget Summary

Function	Object	Amount	Description
1400 - Other Instructional Programs – Elementary / Secondary	100 - Salaries	\$16,231.00	Stipends to pay for teacher participation during summer months
1100 - REGULAR PROGRAMS – ELEMENTARY / SECONDARY	300 - Purchased Professional and Technical Services	\$500.00	Contracted time with RIU6 professional personnel to guide the curriculum revision and implementation process.
		<b>\$16,731.00</b>
